

Introducing Our Contract Buyout Promo

Our CEO has recently authorized us to offer any credit union a way to save money and join the Think|Stack tribe this year.

Do Any of the Following Apply to You?

- You're not happy with your current IT provider (poor service, lack of communication, limited expertise with cybersecurity or cloud, depth of bench, etc.).
- You're stuck in a contract and would love to switch, but you can't until the contract is up.

Switching to Think|Stack has always meant better service, a deep bench of credit union IT experts, and working with a CUSO serving over 180 credit unions around the country.

But now - we can save you money too. Here's how switching to Think|Stack can upgrade your IT, and save you money.

Switching to Think|Stack is as easy as 1-2-3:

1. Think|Stack will buy out your current contract by providing up to 4 months in free services.
2. Your onboarding costs will be discounted 10-15% (based on signing date).
3. No double payments, no downtime, and a seamless transition with zero disruption to your credit union.

We've done this for dozens of credit unions who were feeling stuck. Here's a recent example:

- ABC Credit Union's current MSP contract was up in May 2024.
- They signed with Think|Stack in September 2023.
- We scheduled their onboarding in December 2023, and their onboarding was discounted 15%.
- Think|Stack went on-site in January 2024 to complete the onboarding process.
- Think|Stack service began in February 2024.
- The CU's service from February 2024 - May 2024 was free.
- Regular billing officially started on June 1st.

If you're feeling stuck in your existing IT contract, and want to make the move to Think|Stack - let's schedule a time to talk about what that might look like for your credit union.

Would you be interested in setting up a 30 minute call next week to learn more?
